

FABRICON MODULAR

Panelized Offices

InPlant Offices are the most adaptable workspaces on the market today. We customize these modular building systems specifically to fit your company's requirements.

These structures are versatile and efficient. After initial customization and installation, you have the option to rework an InPlant Office's location, sizes and shape to suit the needs of your expanding, evolving business.

Safety and security are significant benefits of our InPlant Offices. These structures boast insulated, non-combustible wall panels that regulate temperature and safeguard against bad weather, hazardous equipment and noise pollution.

The team at Fabricon Modular understands that time is money! We offer rapid installation, with the finished product installed only 4- 6 weeks from project approval.

Add - Ons

Customer's who use this product also purchase these add-ons.

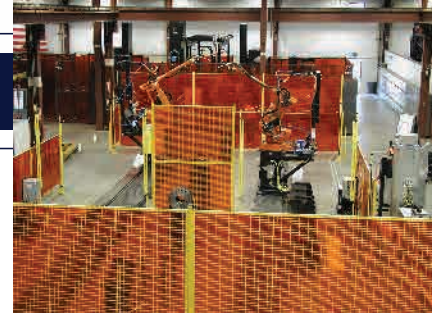

STAIRS & STEPS

Stairs and steps are fabricated to meet a wide variety of specifications allowing for use in many applications including single and multi-story. Designs include re-locatable and reconfigurable options as well as more permanent structures which can be assembled inside a warehouse or on the exterior of modular or traditional constructed buildings. Stair products are available in aluminum, steel and concrete.

INDUSTRIAL BARRIERS & SAFETY

Fabricon Modular provides a wide range of rails and barriers for the protection of your assets in industrial settings. Products include safety rails, swing gates, handrails, door tracks, post and rack guards and more. These solutions minimize the risk of damage to existing racking, in-plant offices, door tracks, etc. due to impacts from material handling equipment.

CURTAINS, PARTITIONS & ENCLOSURES SYSTEMS

As an alternative solution to traditional wall systems, Fabricon Modular offers curtains and partitions which can be customized to fit the wide variety of needs in a warehouse setting. Partitions and curtains offer quick installation, usually within a few days, and an extremely flexible solution to separate anything you need to on the production floor. Curtains are retractable and can be used in exterior and interior applications.

FURNITURE, TECHNOLOGY & APPLIANCES

Our team of experts also provides consulting services to assist with spatial planning of the interior of your modular building to include furniture, technology and appliance solutions.
